

DURATION: 6 WEEKS
4 CREDITS **CERTIFICATE COURSE**

Fundamentals of Sustainable Development Goals

COURSE DESCRIPTION

The course provides the participants insights into the evolving landscape and future of overall development, including economic progress, social equity and environmental sustainability.

The course covers the stakeholders, challenges, pillars of sustainability, and actions that drive the future of climate change, biodiversity, natural resource conservation and social equality.

The course includes real world case studies, group activities, presentations and assignments.

Participants come from diverse backgrounds including researchers, policy and development professionals, faculty, PG students and industry professionals interested in application of sustainability.

LEARNING OBJECTIVES

- Understand the current challenges facing human development
- Understand the relevance and importance of sustainability for an equitable world
- Understand the SDGs, agenda and future roadmap
- Apply and link the concepts of SDGs to your personal and professional lives
